

Alabama A&M-Florida A&M postponed due to Tropical Storm Helene

September 24, 2024 | Courier-Times, The (Roxboro, NC) Author: Field Level Media| Section: National | 134 Words OpenURL Link

Florida A&M has postponed Saturday's home game against Alabama A&M due to the approach of Tropical Storm Helene, the school announced Tuesday. The game instead will be played Friday, Nov. 29, now marking the end of the regular season for both teams. The storm is expected to strengthen into a hurricane Wednesday as it approaches the continental United States. Helene could make landfall near Tallahassee, where FAMU is located, according to weather models. A stretch of coastline ranging from Tallahassee south to Tampa is currently under a hurricane watch. The Florida State Seminoles, also based in Tallahassee, are on the road Saturday at SMU. South Florida, based in Tampa, plays Saturday at Tulane. The NFL's Tampa Bay Buccaneers are scheduled to play a home game against the Philadelphia Eagles on Sunday. --Field Level Media

Football changes made due to storm

September 24, 2024 | Daily Record, The (Dunn, NC) Author: From staff reports | Section: Sports | 143 Words OpenURL Link

Powerful storms are brewing, which means it's officially fall in the Carolinas.

The anticipation of downpours and high winds associated with Tropical Storm Helene has already impacted high school football schedules locally.

Here are the latest updates reported to Daily Record staff members.

According to All American Conference officials, the league's entire four-game slate is rescheduled to this Thursday, Sept. 26.

Westover (3-1, 0-1 AAC) travels to Harnett Central (3-1, 1-0 AAC), Overhills (1-3, 0-1 AAC) hosts E.E. Smith (1-3, 0-1 AAC), Triton (1-3, 1-0 AAC) welcomes Terry Sanford (2-2, 1-0 AAC) and Western Harnett (0-4, 0-1 AAC) plays at Pine Forest (2-2, 1-0 AAC).

Meanwhile, in the Quad County Conference, South Johnston (3-1, 1-0 QCC) also agreed to play Thursday and will hit the road for a matchup with Fike.

All games are set for 7 p.m. kickoffs.

[Note: Midway and Hobbton are inactive due to bye weeks]

Helene is now a strengthening hurricane. Here's what it could mean for Wilmington

September 24, 2024 | StarNews (Wilmington, NC) Author: Renee Spencer and Gareth McGrath, Wilmington StarNews | Section: News | 924 Words OpenURL Link

(This story was updated to add new information.)

A strengthening Hurricane Helene continued its brisk trek toward the Florida Panhandle Wednesday as officials warned residents across the Southeast to prepare for a storm that could bring heavy rains and gusty winds to much of the region - parts of which, including the Wilmington area, that were still recovering from the soaking and damage delivered by last week's unnamed storm.

The National Hurricane Center said that Helene, fueled by the very warm waters in the Gulf of Mexico, could become a strong Category 3 hurricane, with winds approaching 130 mph, by the time it makes landfall along the Florida panhandle late Thursday.

Storm surge in parts of the Sunshine State's Big Bend area could reach 15 feet, with wind gusts potentially reaching well into the triple digits. Areas along the Florida west coast, including Tampa Bay, also could see major storm surge and wind impacts.

While impacts as strong as that won't be felt in Southeastern North Carolina, emergency officials said Wilmingtonarea residents need to keep an eye on the storm even though it's expected path would take it north after landfall into the Atlanta metro area, Western North Carolina, Tennessee and then the Ohio Valley.

According to a forecast from the National Weather Service's Wilmington office, Helene is expected to bring wet and gusty conditions to the Wilmington area on Thursday and Friday. Beside the additional precipitation falling around the Cape Fear region, officials also were worried about the impact of rain falling in inland areas and then filling already swollen rivers and lakes as the runoff makes its way toward the coast.

The impacts could harm recovery efforts in Brunswick County just a week after historic flooding brought 20 inches of rain to some areas, damaging homes and washing out several roads.

Webcams: See Panama City, Florida area beach conditions

What to expect in the Wilmington area

Forecasters said the area is expected to receive 2 to 4 inches of rain beginning late Thursday and into Friday, with some areas seeing higher rainfall totals. On Thursday night, the storm could bring wind gusts greater than 25 mph, and isolated tornadoes are possible.

Minor coastal flooding is possible at the beaches Friday and along the Lower Cape Fear River during the high tide. Hazardous marine conditions are possible later this week, with 7- to 10-foot seas possible and gale-force wind gusts Thursday night and Friday.

What this could mean for recovery efforts

Any impact from Tropical Storm Helene comes on the heels of an unnamed storm known as Potential Tropical Cyclone 8, which dropped 20 inches of rain on areas of southeast Brunswick and southern New Hanover counties.

Mark Bacon, a forecaster with the local weather service's office, said Tuesday that it's still too early to tell how the additional rain will impact the area, but he noted areas like Carolina Beach and Southport, which were hit hard by

last week's storm, will be particularly sensitive to the additional rainfall. But he noted a lot of it depends on the speed and concentration of that rainfall.

"Not all 2 to 4-inch rain events are created equal," Bacon said.

Bacon said forecasters are predicting Tropical Storm Helene will have greater impacts in western North Carolina with "disastrous" flooding in the mountains. Late Wednesday the hurricane center warned that rainfall could amount to as much as 15 inches in parts of the lower Appalachians in North Carolina, Tennessee and Kentucky.

The N.C. Department of Transportation (DOT) is keeping an eye on the forecast for this week.

Agency spokesperson Lauren Haviland said as of right now the primary focus is to "continue to work on getting roads damaged by last week's storm reopened."

But she acknowledges the additional rain could affect their progress.

"The rain forecasted for this week could delay the ongoing recovery for a few reasons: we want to keep everyone safe and many of the recovery efforts include paving, which can't be completed in the rain," Haviland said in an email. "Should it rain as expected, NCDOT will inspect the newly repaired roads to ensure everything remains safe."

Brunswick County officials are also staying updated on Tropical Storm Helene. Brunswick County Emergency Management Director David McIntire said they know many in the community are still focused on Potential Tropical Cyclone 8 and are starting recovery efforts, but they urge residents to "remain vigilant in watching Helene and having their plans in place for any impacts."

"Right now, forecasts project 2 to 4 inches of rain late Thursday into Friday with possible higher amounts, but we also know from recent experience that those estimates could change suddenly," McIntire said in an email. "With localized flooding still impacting certain areas and roads countywide, as well as coastal flooding, community members need to be cautious when commuting and should never drive through any flood waters or around barricades as some roads are still closed due to damages from PTC #8."

Stone Mountain News

September 24, 2024 | Tribune, The (Elkin, NC) Author: Ola K. Norman Onorman@wilkes.net| Section: Lifestyles | 399 Words OpenURL Link

Traphill Fire Dept will be having BINGO Saturday, Oct. 5, beginning with serving chicken stew at 6 p.m. with BINGO to start at 7 p.m. Go out and support our great fire dept who worked so hard all last weekend.

If Stone Mtn State Park is opened by next Sunday, Oct. 6, Adam Collins will be preaching at Garden Creek Baptist Church at 9 a.m. Everyone is invited to worship in this historic church within the Stone Mtn State Park. Stone Mtn State Park visitors are invited to come as they are.

Stone Mtn State Park will be closed this week until further notice while they clean up all the debris from Hurricane Helene. They say that Garden Creek Baptist Church seems to be okay as far as they can tell from the road.

Wayne McMeans, with the ICGH substance recovery mobile unit is at the Traphill Branch Library on the 1st and 3rd Tuesdays, from 10 a.m. until 3 p.m.

The next "Jammin" session at the Traphill Branch Library will be Saturday, Oct. 12 from 1 to 3 p.m. Bring your instrument and join in making some music or just come and listen.

The Friends of Traphill Library will have a meeting on Saturday, Oct. 12 at 11 a.m. at the library. Everyone is invited to this meeting.

After two and a half days of no power I think everyone is glad to have it back. Many thanks go to all the linemen and workers who worked all weekend to restore it and to all the Traphill firemen who worked so hard to clear our roads. Let's all pray the storms that are brewing will fizzle out and not head our way next week as is being forecast.

Happy birthday wishes go to Wilma Shew, Larry Pierce, Cameron Cook & Jayce Bo Collins on Oct. 1, Marie Smith on Oct. 3, Janice H. McGrady on Oct. 4, Sophia Brewer on Oct. 5, and Kenneth Cothren and Gary Kennedy on Oct. 6.

Happy anniversary wishes go to Sally and Bob Andrews who celebrate 41 years together on Oct. 1, Beth and Brian McDaniel who celebrate 7 years together on Oct. 1, and Lynette and Sarge Winters who celebrate 39 years together on Oct. 4.

Traphill had a low temperature of 53 degrees on Sept. 23 and a high temperature of 92 degrees on Sept. 23. There was 9.6 inches of rain during the week of Sept. 22—28.

Near-hurricane-strength storm to reach Charlotte area, Hurricane Center maps show

September 23, 2024 | Charlotte Observer, The: Web Edition Articles (NC) Author: Joe Marusak, The Charlotte Observer | Section: weather_news | 369 Words OpenURL Link

Tropical Storm Helene is expected to strengthen into a hurricane before arriving in the Charlotte area this week, National Hurricane Center officials said Tuesday night. But it's unclear how intense it will be when it arrives here.

The storm could spawn tornadoes and knock out power, according to an alert by the NWS office in Greer, South Carolina.

Helene should arrive in the western Carolinas and northeast Georgia Thursday night and Friday, "bringing gusty winds and heavy rainfall to the area," according to an alert by the NWS office in Greer, South Carolina.

Helene's predicted path shifted west of Charlotte overnight to the extreme western Carolinas' mountains, Tennessee, Kentucky and, eventually, Indiana and a sliver of Ohio, according to National Hurricane Center maps of the storm at 5 p.m. Tuesday. The Charlotte region should still expect rains and winds from the storm, NWS forecasters said in an alert.

At 6 p.m. Tuesday, "confidence continues to increase with regard to the potential impacts of Helene," the NWS office in Greer, South Carolina, said on X, the former Twitter.

"The flood threat will become significant Thursday night into Friday," according to the NWS. "This has the potential to be an extremely rare event."

Showers are forecast to arrive in Charlotte late Thursday and continue until 11 a.m. Friday, with bouts of heavy rain throughout the night and morning, according to the NWS Charlotte forecast at 6 p.m. Tuesday.

Helene is expected to become a major hurricane near the northeastern Gulf Coast on Thursday, bringing life-threatening storm surge and hurricane-force winds to the Florida Panhandle and Florida west coasts, National Hurricane Center officials said in a 5 p.m. update Tuesday.

"Residents should ensure they have their hurricane plan in place," center officials said, referring to Floridians.

At 5 p.m. Tuesday, Helene's winds strengthened to 55 mph, with higher gusts, according to the National Hurricane Center.

Helene is expected to become a hurricane on Wednesday and strengthen over the eastern Gulf of Mexico into a major hurricane on Thursday, center officials said.

Storm surge watches were in effect Tuesday night for parts of the Florida Gulf Coast, according to the National Hurricane Center.

At 5 p.m. Tuesday, Helene was about 155 miles southeast of Cozumel, Mexico.

This is a developing story that will be updated.

More rain on the way as Tropical Storm Helene strengthens, and its path includes NC

September 23, 2024 | News & Observer, The: Web Edition Articles (Raleigh, NC) Author: Brooke Cain and Renee Umsted, News & Observer | Section: weather news | 406 Words OpenURL Link

Central North Carolina, including the Triangle area, will experience rain and storms this week as a tropical system makes its way to Florida through the Gulf of Mexico.

The system, which is sitting in the Caribbean Sea, was named Tropical Storm Helene around 11 a.m. Tuesday, Sept. 24, according to the National Hurricane Center.

It is expected to be near-hurricane strength early Wednesday, Sept. 25, when it reaches the far northwestern Caribbean, says the National Weather Service's Raleigh office.

The storm is expected to intensify into a major hurricane before it approaches the northeastern Gulf Coast on Thursday, Sept. 26, bringing the potential for "life-threatening storm surge and damaging hurricane-force winds" along the Florida Panhandle and the west Florida gulf coast, according to NWS Raleigh.

A Tuesday, Sept. 24, update from AccuWeather said the storm could "make landfall as a major hurricane of Category 3 strength" but "could reach Category 4 status (130-156 mph) at some point while it is over the Gulf of Mexico."

"The highest landfall probability at this time is somewhere along the coast of the Florida Panhandle late Thursday," said AccuWeather, but a track into the Florida Peninsula could mean an earlier landfall Thursday.

accuweather sept 24.JPG

What are the impacts for Raleigh and central NC?

As of Tuesday, NWS Raleigh forecasts gusty winds and heavy rains with possible tornado threats, late Thursday, Sept. 26 into Saturday, Sept. 28, depending on the track. There's also the potential for "considerable isolated flash and urban flooding" across the southeast and southern Appalachians.

NWS also says "minor to isolated moderate river flooding will be possible."

tropical rain accuweather sept 23.JPGThe exclusive AccuWeather forecast, as of Sept. 23, showing expected rainfall as a result of Tropical Cyclone 9.

Central NC, including the Triangle, is expected to have higher than normal temps all week, along with higher than normal rainfall.

Another tropical wave to the west of Africa is not forecast to pose a risk to North or South Carolina.

Hurricane John makes landfall in Mexico

Meanwhile, Hurricane John, a North Pacific storm, made landfall in south-central Mexico on Monday, Sept. 23, and "life-threatening impacts from flooding rainfall and mudslides" are in the forecast, says AccuWeather.

The system will continue to produce heavy rains over portions of Central America during the next several days.

Hurricane John is not expected to impact the Carolinas.

In Helene's wake, leadership is crucial

September 23, 2024 | Yadkin Ripple, The (Yadkinville, NC) Author: John Hood| Section: Opinion| 647 Words OpenURL Link

RALEIGH — I got it wrong. Deeply wrong. Embarrassingly wrong.

It was a few days after Hurricane Floyd struck the coast on September 16, 1999. I'd been covering North Carolina politics for more than a dozen years by then, penning my syndicated column and appearing regularly on radio and television. Our discussion program "N.C. Spin" had debuted the previous fall on the Triangle's Fox affiliate and was in the process of expanding to some two dozen TV and radio stations across the state.

During a segment of the show devoted to the destruction wrought by Floyd, I said something to the effect that North Carolina's emergency personnel, government agencies, utilities, private contractors, and relief organizations knew what to do and how to do it. They didn't need politicians holding press conferences and yapping incessantly about matters beyond their ken.

I thought I was praising the skill and determination of those at the forefront of the response to Hurricane Floyd, which devastated much of eastern North Carolina and killed an estimated 85 people, including 51 North Carolinians. I thought I was championing policy expertise over political exploitation.

What I was really doing was exhibiting my ignorance.

One "N.C. Spin" viewer was particularly incensed: then-Gov. Jim Hunt. One of the targets of my criticism, he let it be known through a mutual acquaintance that he considered my argument poorly reasoned. I don't remember the specifics of what got passed on to me, but it was something to the effect that in times of crisis, political leadership is crucial.

Emergency responders aren't necessarily sure what to do when. Agencies butt heads. Harried public and private actors misinterpret, miscommunicate, and inadvertently misinform. Sometimes they move too slowly, making people wait too long for rescue and relief. At other times they react recklessly, misspending scarce resources on lower priorities rather than waiting to make wiser decisions with a firmer grasp of the facts on the ground.

It is the task of leaders, elected and appointed, to make such judgment calls, to focus minds and referee disputes, to comfort the suffering, and to offer hope and reassurance to a panicky public.

Now, as North Carolinians grapple with the tragic aftermath of another monstrous storm, Gov. Roy Cooper and other political and civic leaders must rise to the challenge Hunt helped me grasp a quarter of a century ago.

Helene has ravaged western North Carolina. Her path of destruction is broad, deep, and jaw-dropping. Homes, businesses, entire towns crushed or swept away. At this writing, hundreds of thousands of people remain without power, some trapped in place by gaping holes or raging rivers. The death count, already heart-rending, will grow as more of the missing are found.

North Carolina will recover. We will rebuild. We've done it before. But there's nothing automatic about the process. And we all have parts to play in it, whatever our roles, wherever we live.

If you have family or friends in the affected areas, keep trying to reach them. Once you do, offer help and comfort. If you'd like to contribute money, supplies, or volunteer time to relief and recovery efforts, there are many organizations well-situated to deploy your gifts effectively, including Samaritan's Purse, Baptists on Mission, Catholic Charities USA, and Operation Airdrop.

At the state level, lawmakers have prudently accumulated \$4.75 billion in our rainy-day fund plus billions more in unreserved credit balance. That rainy day is here. Localities will spend additional dollars from their own reserves, as will utility companies, cooperatives, and municipal agencies.

There are many tough decisions to be made, some now, some weeks or months from now as the full extent of the needs and priorities come more clearly into view. That's something else I learned from past disasters. Some funds originally earmarked for reconstruction after Hurricane Matthew in 2016 have still not been expended.

Through it all, North Carolinians will look to our leaders for guidance and reassurance. Pray for them, and for us all. © 2024 The Yadkin Ripple. All Rights Reserved.
